- Our training program at HEIDENHAIN is conducted in a closed lab setting with each student using their own simulator matching the control they use on the job.

- The lab also includes a 3-axis knee mill used for hands-on training.

- Program training classes are 3 days.

- Training includes daily lunches and refreshments throughout the day.

- We also have corporate rates at the local hotels as well as plenty of choices in the local area for your evening meals and entertainment.

- For additional information, contact:
